

Spring容器加载属性文件

1、创建一个属性文件

File Edit Navigate Search Project Run Window Help

2、使用spring容器扫描属性文件。

```
1 <context:property-placeholder location="classpath:properties/*.properties" />
```

3、@Value注解取属性的值。

```
19 //
20 @Service
21 public class PictureServiceImpl implements PictureService {
22
23     @Value("${IMAGE_SERVER_BASE_URL}")
24     private String IMAGE_SERVER_BASE_URL;
25
26     @Override
27     public PictureResult uploadPic(MultipartFile picFile) {
28         PictureResult result = new PictureResult();
```
